

## WOMEN IN TECHNOLOGY

UMass Lowell is holding a first-ever event for female high school juniors and senior who are interested in Science and Engineering, to showcase UML as a place to pursue these careers.

The event includes a catered lunch for students and their families, and will be held on Sunday, October 23 from 12:30 to 3:00 pm. In the morning, we're holding our campus wide open house.

Would you please invite any young women in your classes who are thinking about science or engineering to participate? The registration URL is:
