

Dear Families,

Our vision of the Haverhill Public School, School Counseling Department is to provide students with instruction, support, and an understanding of the possibilities in their future. Sometimes there are online platforms that you may not quite understand how it works or how it is beneficial to your student's personal future plans. We would like to offer you for the first time an opportunity to see an inside view of the Naviance Program.

The best 25 minutes you can spend!

How does Naviance work? View an easy video tutorial to learn the online platform your students work with each year.

Students in grades 5-12 have access on their launchpad to a whole new world of college and career planning. Naviance is a software platform that helps students, parents, and school staff with the college application process and career readiness. It offers a variety of tools and features dependent upon the school's settings. Naviance can send colleges your grades, test scores, and letters of recommendation as it interfaces directly with the Common App, and allows high schools to send out all of the information conveniently. It's not just all about college~ it has so many other aspects too!

Counselors & CTE coordinators have carefully selected tasks that are assigned to each grade level. Students have access to work on these tasks during their in-school workshops when counselors visit classrooms to instruct and explore their personal choices. Students have access to explore on their own as well at home.

This is a 25-minute video that provides you with the ins and outs of Naviance. You will be able to access your student's account from their Chromebook using their email and password.

Click on the highlighted link below to start your 25-minute journey. Enjoy!
